Industrial Matting Solutions**
2021 Catalogue

Introduction

Welcome to the 2021 COBA Africa catalogue, which is packed with all our latest floor matting and safety products.

COBA Africa is part of the globally successful COBA International group, headquartered in the United Kingdom with over 40 years' experience in the matting manufacturing industry. The last two years has seen exciting developments within COBA's matting business in South Africa.

In 2014, COBA Plastics (Pty) Ltd acquired Rubaloy, a Cape Town based company specialising in the manufacture of recycled rubber flooring products. Expansion continued in 2015 when Matco, a long-established matting and flooring business based in Johannesburg joined our ever-evolving COBA family.

Bringing together all our respective market leading brands, expertise and resources, we now trade under the umbrella of COBA Africa (Pty) Ltd operating from our facilities in Cape Town and Johannesburg. Our prime locations give us a logistical advantage. We can efficiently supply customers throughout South Africa, from the North West of the region to the Western Cape.

As you will see from this catalogue, our product range is diverse and extensive. There are flooring and matting products for many different environments. From durable anti-slip GRP flooring and high quality, impressive entrance mats, to safety matting for industrial, catering or leisure areas. With so much choice, you can be assured that COBA Africa has the perfect, competitively priced solution for your building.

If you are responsible for health and safety in your organisation, then we have also included some useful information on standing safety in the workplace. Find out how anti-fatigue/anti-slip matting can help to reduce musculoskeletal disorders and accidents in the workplace. Read our case studies too.

COBA Africa is not just about flooring and matting. We also supply a range of safety knives in our Moving Edge collection, details of which can be found in this catalogue.

Our knowledgeable sales advisors are just a telephone call or email away, and they will be delighted to help with your matting, flooring or safety knife enquiry.

Workplace Matting 06

Africa's most comprehensive range of anti-fatigue and non-slip safety matting.

ESD Mats & Equipment 26

Electrostatic dissipative matting and accessories.

Floor Level Safety Accessories 30

Anti-slip floor tapes, cable protectors and GRP safety accessories.

Floor Coverings 36

A range of permanent and temporary rubber and PVC floor coverings.

Matco Entrance Matting Systems 38

A range of durable matting systems for busy entrance areas, such as retail, schools, hospitals and transport terminals.

COVID-19 Response Range 46

Products and guidance on managing facilities during the Coronavirus pandemic in 2020.

Entrance Mats 70

Internal and external entrance doormats for every environment.

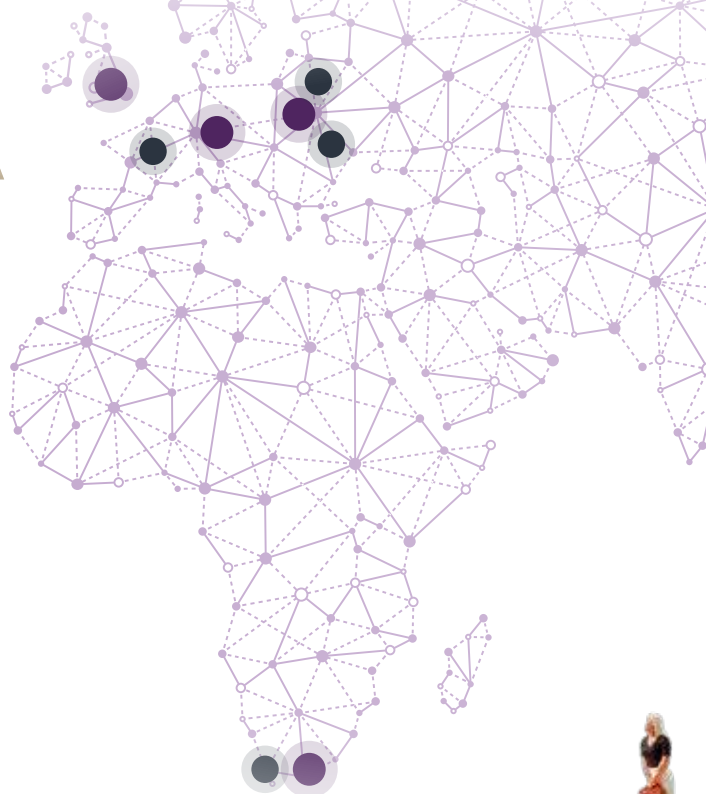

Mats for Catering 80

Anti-slip matting for the catering industry.

Mats for Leisure 90

Anti-slip matting for the leisure industry.

Global Reach, Local Service.

Product Testing Guide

In partnership with the internationally recognised SATRA, we have tested over 40 product lines to the latest standards in slip and fire safety, and ESD ratings.

Fire Test: BS EN 13501-1

Reaction to fire classification

The classification is split into three parts:

The main part of the classification is its letter – A1, A2, B, C, D, E and F. A1 (Non-combustible) is the highest level of performance.

There is a smoke classification of s1, s2 or s3. s1 is the highest level of performance.

There is a classification of flaming droplets of d0, d1 or d2. d0 is the highest level of performance.

ESD Test: IEC 61340-5-1

Protection of electronic devices from electrostatic phenomena - General requirements

Pendulum Slip Test: BS 7976-2:2002+A1:2013

Internationally recognised British standard that uses a pendulum device to measure a surface material's slip potential.

Slip Potential	PTV
High slip potential	0 – 24
Moderate slip potential	25 – 35
Low slip potential	36+

Ramp Slip Test: DIN 51130:2014

Internationally recognised German standard that measures slip potential by the angle at which the surface material loses friction.

R Value	Category Static Friction is	Angle of Inclination
R9	Low	6° to 10°
R10	Normal	>10° to 19°
R11	Above Average	>19° to 27°
R12	High	>27° to 35°
R13	Very High	>35°

Ramp Slip Test: DIN 51097

Internationally recognised German standard that for testing surface materials in wet, soapy conditions such as those found in leisure industry.

Classification	A	B	C
Slip Angle	12 – 17	18 – 23	>24
CoF	0.21-0.31	0.32-0.42	>0.45

Prolonged standing on hard floor surfaces in static positions can lead to fatigue, pain and serious health issues such as MSDs (Musculoskeletal Disorders).

Standing Fatigue in the Workplace

What is a Musculoskeletal Disorder?

Musculoskeletal Disorders (MSDs) are injuries or conditions affecting the movement of the human body, or the loco-motor apparatus. They are problems that affect the muscles, tendons, ligaments, vascular system, nerves, soft tissues, bones and joints.

Very often such problems creep in gradually. They can affect both the upper and lower limbs, as well as the back. **Many MSDs are preventable.**

MSDs are currently the most common work-related health condition in the EU. They are expected to affect some 50% of the population by 2030.¹

The Problem with Standing

When standing still, gravity causes fluid to settle in the feet and legs, which in turn can create pooling and swelling. Standing puts the circulatory system under pressure, in particular the Venous System, making the heart work harder. Regular standing in static positions can slowly damage the elasticity of soft tissues. This degenerative damage can lead to rheumatic diseases.

As tiredness sets in joints such as the ankles and knees can tense up and become locked. There is a tendency to shift weight from one side to the other, increasing the release of muscular energy which can lead to fatigue.

86%

Found Anti-Fatigue matting had helped to reduce pain or serious health complaints of staff⁴

82%

Found Anti-Fatigue matting to have a positive effect on increasing productivity in their company⁴

Anti-Fatigue matting can help...

Anti-Fatigue matting can relieve the pressure from standing. It has been scientifically proven to reduce discomfort and fatigue, especially to the lower and upper legs, and lower back areas compared to standing on hard floor surfaces.

How does Anti-Fatigue matting work?

Anti-Fatigue mats encourage regular foot movement (even in static positions). The feet subtly adapt to the mats cushioned surface, promoting healthy circulation. This movement, although subtle, makes the foot and calf muscles expand and contract, activating the Venous Pump pushing blood back up to the heart against the force of gravity. This naturally occurs when we walk. Anti-Fatigue mats help to replicate this action even when the user is standing in a static position.

Over 45%

of workers complain of standing in tiring positions at work³

14 days

Average time lost due to each MSD case²

6.6 million

Working days lost to MSDs in the UK in 2017-18²

Workplace Matting

Improving standing comfort and safety

For decades, COBA Africa has been a market leader in workplace safety matting, and today we offer one of the most comprehensive ranges for all types of working environments, from industrial to catering and retail. Whether it is to reduce slipping or provide fatigue relief from standing, we have a solution to suit a wide variety of budgets and needs.

Orthomat® Office

The anti-fatigue mat for office workers

Improves overall posture and wellbeing when standing in static positions. • Provides just the right balance between cushioning and foot support for users of sit/standing desks. • Helps to delay the onset of pain and tiredness otherwise experienced from standing on hard or firm floor surfaces. • Textured underside keeps this anti-fatigue mat in place. • Gentle bevelled edges to reduce trip hazards, while creating a neat 'anti-curl' finish that sits flush to the floor. • Highly durable, can withstand a wide range of footwear. • Handy size for ease of handling making lifting and moving an effortless task. • Fits into most office workstations. • Material: PU • Product Height: 16mm

Size	Black
0.5 m x 0.8 m	OO010001

Chairmats

100% Recycled PVC Interlocking Floor Tiles

An ideal low cost solution for protecting floor surfaces. Easy DIY • installation - no adhesive required. • Installation instructions provided. • Made from 100% recycled PVC – non-conductive and fire resistant. • Each Chairmat consists of smooth interlocking tiles and edging. • Suitable for dry indoor environments • Product Height 6mm

Orthomat® Standard

Quickly tackle standing fatigue in dry workplaces

Versatile single layer foam anti-fatigue mat.

- Insulates standing workers against the effects of cold concrete floors.
- Lightweight, so easy to transport and reposition.
- Best suited to dry environments.
- High visibility version available with bright yellow borders.
- Ideal for lighter industrial use.
- Textured surface provides attractive appearance.
- Available in mats and rolls.
- Fire tested to BS EN 13501-1.
- Material: Open Cell PVC (Foam)
- Product Height: 9.5mm

0.9m x per linear metre	FF040003C	FF010003C	3.80 kg

Comfort-Lok

Fatigue relief for standing workers on production lines or benches

Heavy-duty rubber mats provide a comfortable standing surface for operatives. • Available as interlocking modules for long runs, or as a single workstation mat. • Resistant to oil and grease making it ideal for food production areas or in any catering business. • Suitable for high temperature environments. • Slip tested to DIN 51130. • Material: Natural rubber/25% NBR blend • Product Height: 12mm

Sizes	Black	Weight
0.7 m x 0.8 m (edged all round)	CL010004	4.10 kg

0.7 m x 0.8 m (interlocking end piece)	CL010001	4.10 kg

Diamond Tread

Fatigue relief for welding professionals

Welders need relief from standing like any other professional. • The heavy-duty top surface is both resilient and fire tested, whilst the soft foam underlayer provides cushioning for the feet. • Ideal for welding bays and demanding industrial use. • Flame retardant top surface (tested to BS EN 13501-1) – so weld sparks aren't an issue. • Loose lay – can be moved easily. • Bevelled edges help avoid creating a trip risk. • Material: Vinyl top surface with PVC foam backing (fusion bonded, not glued) • Product Height: 15mm

Slips in the Workplace: Taking slips and trips seriously

Across Europe, slips in the workplace are a real concern. It's not just sprains and bruises. Slips all too frequently result in bone fractures or internal injuries of one sort or another. In the most extreme cases, slips can result in fatalities. Slipping is especially dangerous if the individual falls onto a sharp or moving object, falls from height or comes into contact with hot surfaces, or chemicals.

What are the causes?

Contaminants on floor surfaces are very often the culprit. This can be water, ice, oil, grease, chemical spillage, etc. It is not just spilt liquids that make floor surfaces dangerous. Swarf, powders and other dry debris can act like marbles on a floor surface. Uneven and poorly maintained floor surfaces can also cause both slips and trips.

What can be done?

Good house-keeping is essential and educating employees about risks is imperative. Ensuring that floors are regularly cleaned and maintained, so they are free of contaminants should help to reduce the risk of slipping significantly. Use cable protectors for trailing wires. Floor safety should be evaluated frequently, with regular risk assessments.

The Health & Safety Executive provides useful guidance for risk assessments and also offers a Slips Assessment Tool (SAT). Carefully consider any risks. Initiating preventative measures, such as the installation of anti-slip matting, flooring or coating can dramatically improve safety underfoot. Ensure the area is well lit.

Did you know?

Slips, trips and falls on the same level remain the most common cause of non-fatal accident in the UK workplace, and many result in major injury and human suffering. 90% of all reported 'specified' non-fatal injuries under RIDDOR resulted in fractures. The Labour Force Survey estimates that there were 555,000 non-fatal self-reported injuries to workers in the UK during 2017/18, of which some 135,000 resulted in over 7 days absence.³

High risk sectors

Healthcare; Education; Food & Drink Manufacture; Catering & Hospitality; Manufacturing/Engineering (General); Building & Plant Maintenance; Oil & Gas Industries; Shipping & Docks; and Construction are all considered as high risk slip sectors.

R558K

estimated *Cost to Society* (Britain per case) based on a non-fatal workplace injury resulting in 7 or more days absence²

31%

of reported non-fatal injuries in Great Britain during 2017-18 were accounted to slip, trips and falls on the same level¹

Hygimat

A revolutionary hygienic anti-fatigue mat

Improve feeling of comfort and energy whilst standing at work. • Ideal for any workplace where hygiene is important e.g. healthcare, food manufacturing, catering, hospitality, clean rooms or food retail. • Made from a revolutionary 'gel foam' material that combines the best in durability and comfort. • Material also has anti-microbial properties • Closed cell construction means that no liquids can penetrate the mat and reduce performance. • Version with holes is ideal for wet workplaces in need of drainage. • Oil resistant. • Easily cleaned – can be cleaned with detergent or can be steam sterilised. • Fire tested to BS EN 13501-1 Class Dfl - s1 and slip tested to DIN 51130. • Material: Rubberised Gel Foam • Product Height: 17mm ±1mm

Flexi-Deck

Flexible PVC floor tiles ideal for wet areas

Flexible PVC interlinking tiles for industrial use. • Holes allow drainage of liquid and debris. • Specially designed underside studs have exceptional water drainage properties. • Anti-slip top surface for a safe footing in wet conditions. • Easily cleaned, rolled up and moved. • Resistant to most oils and chemicals. • Holes provide efficient drainage and allow air to circulate. • Product Height: 13mm

COBAmat® Standard

Standing the test of time, our original safety matting

The original premium multi-purpose safety mat widely used across industry today. • An ideal choice for longer production lines, or for covering mezzanine floors. • Vinyl strips are interwoven, rather than welded, for better flexibility and lower risk of breaking. • Cross-ribbed grip to reduce slipping. • Fully reversible for added longevity. • Fire tested to BS EN 13501-1 and slip tested to DIN 51130. • 30mm x 30mm hole size. • Material: PVC • Product Height: 12mm

40 Years of COBAmat®

Where it all started...

2019 marks 40 years since COBAmat was first launched. The concept of safety matting was still very new back in 1979. Factory workers traditionally used cardboard, or wooden or metal duckboards as a standing surface to insulate their feet from cold concrete floors. COBAmat changed all that.

At the time, COBA Europe didn't exist. The new matting operation originally traded as part of COBA Plastics Ltd, an established thermoplastic extrusions manufacturer supplying extruded components to a variety of sectors, from automotive to medical and packaging. Always innovative, COBA had spotted an opportunity for another use for its PVC extrusions.

Strips of extruded PVC were hand woven using a specialist technique, resulting in superior strength and flexibility compared to similar welded designs.

And so COBAmat (initially called Airomat) was born.

Walking on Air

Of course, it was not long before news started to spread about this new safety mat.

Demand for COBAmat grew swiftly as customers reaped the benefits from standing on flooring described in marketing literature as 'walking on air'.

COBAmat could be seen in all sorts of places, from factory floors and leisure environments, to marine and motorsport. People who normally stood on hard, potentially slippery floors were delighted with the product that made standing more comfortable and floor surfaces safer.

Today, COBA Africa boasts over 150 floor safety products, facilities in 7 countries, and a global network of distributors.

The innovation that started it all, COBAmat, is still manufactured in the same way in the UK, and remains one of our most popular safety mats.

SitePath

Create high visibility walkways with ease

A lightweight matting for easy deployment on construction or factory sites. • Flexible material can be laid onto uneven surfaces. • Diamond pattern top surface. • Yellow colour ensures walkways are easily visible. • Easily cleaned with a jet washer or hose. • Supplied in long rolls for easy installation. • Can be laid loose or adhered to the floor. • Low profile reduces trip potential. • Material: PVC • Product Height: 2mm

Sizes	Yellow
1 m x 5 m	SP070001C5
1 m x 10 m	SP070001

GripSafe

Protective liner for workbenches and much more!

Adaptable non-slip liner to protect both tools and shelves or workbenches. • Keep worktop items in place without the need for stands or clamps. • Fit inside drawers to reduce tools moving around. • Use on vehicle dashboards to prevent movement in transit. • Cuts easily, so you can fit to any space. • Very light - doesn't add extra weight to benches or toolboxes. • Wear resistant and machine washable providing a long lifespan. • Material: PVC foam • Product Height: 4mm

ESD Mats & Equipment

All you need for ESD protection

Electrostatic Discharge (ESD) can be a problem in some working environments, and potentially damaging to electrical components. Floors, chairs, work surfaces and packaging can all create static electricity, which when released into an electronic device becomes known as Electrostatic Discharge. We have a comprehensive range of industry tested ESD floor mats and accessories to protect you and your electronic components against the harmful effects of static electricity.

High voltage matting

COBASwitch VDE

VDE approved electrical switchboard matting for personal protection

Lightweight VDE approved mat designed for use in front of open switchboards and high voltage equipment. • Provides safety for operatives against electric shocks. • Fine fluted surface has slip-resistance benefits. • Tested to 50,000 volts according to DIN EN60243-1 (VDE0303 part 21) IEC 60243-2:1996. • Material: Rubber mix • Product Height: 3mm

Sizes

Sizes	Grey

COBAelite® ESD

Bubble surfaced mat to tackle fatigue in ESD sensitive areas

Static-dissipative anti-fatigue mat for comfort and safety. • Conductive buried layer neutralises static charge, protecting components. • Comfortable bubbled surface promotes subtle movement further reducing fatigue. • Grounded via a 10mm male stud fitted to the mat. • Meets or exceeds IEC61340-5-1 resistance requirements. • Resistance to a groundable point (Rgp): $2.4 \times 10^6 \Omega$ • Material: PU • Product Height: 14mm

Part code	Description
	COBAelite® ESD Studded Mat
SE010001ESD	0.6m x 0.9m
SE010003ESD	0.9m x 1.2m
SE01FLOORKIT	COBAelite® ESD Floor Kit
	Kit includes:
	• Floormat Grounding Wire
	• Yellow Earth Bonding Plug – UK
	• 3 Pin Plug Adaptor - SA

Part code	Description
	ESD Studded Rubber Bench Mat
ESDB010005	0.6m x 1.2m x 2mm Black

	• Yellow Earth Bonding Plug – UK
	• 3 Pin Plug Adaptor - SA

ESD Rubber Bench Mat

Economical ESD work bench mat

Rubber ESD bench mat fitted with 10 mm male stud. • Solder iron resistant and low reflecting surface, ideal for working with electrical components. • Easy to clean smooth surface. • Conforms to IEC 61340-5-1. • Point to point resistance (Rp-p): $1.2 \times 10^4 \Omega$ • Material: Rubber • Product Height: 2 mm

Size	Black
0.6 m x 1.2 m x 2 mm	ESDB010005

NEW

Wristbands

Comfortable and functional grounding wristband

Crochet style elasticated, fully adjustable wristband, manufactured in the UK. • Woven silver monofilaments conduct static while providing excellent band to skin contact. • Fits to the coiled ground wire via a 10mm male stud. • Meets or exceeds IEC61340-5-1.

UK Earth Bonding Plug

Standard plug to connect ESD floor or bench mats to earth

An ideal solution to connect bench and floor mats to ground to avoid injury to personnel and damage to components. • Works well with the anti-static wristband for personnel. • Neutral and mains voltage pins are made from plastic, whilst the earth pin is metal for guaranteed safety. • UK and EU versions available. • Does not have a resistor as this is integrated with the grounding wire.

Common Point Ground Wire

Safely grounds ESD Matting and operators

10mm female stud at one end for connection to a 10mm male stud on an Earth Bonding Plug. • 10mm female stud for connection to the mat, along with a 10mm male stud. • 4mm banana socket for connection to operator coil cord. • Length: 4.5 m wire for connection to earth plug.

Floor Mat Grounding Wire

Help protect equipment from static with an earth grounding wire

Grounding wire for use with floor mats to help prevent static which could damage equipment. • Conforms to 10mm connection. • Easy connection with female studs on each end. • Fitted with a 1 meg Ω resistor to help static discharge.

Coil Cord

For use with an ESD Wristband

PE conductive coil cord. • Good coil memory and tangle-free. • 1 meg Ω resistor incorporated for operator safety. • 10mm female stud to 10mm female stud. • Max length: 1.8 m.

ESD Explained

Electrostatic Discharge (or ESD) is the sudden release of electricity between two electrically charged objects, commonly referred to as static electricity.

Facilities where electronic components are manufactured, data centres or areas where flammable materials are present, are just some examples of locations that have to be especially careful in controlling ESD.

An effective solution is static-dissipative floor or work bench matting (ESD matting) which has conductive properties to draw the electric current away from the component.

For ultimate protection, they are used in conjunction with specialist ESD accessories such as heel grounders, wristbands and cords.

It is critical not to confuse static-dissipative (ESD) matting with 'Anti-Static' or 'electrical switchboard matting'.

Resistance Ω	10^3 to 10^5	10^5 to 10^9	10^9 to 10^{12}	$> 10^{13}$
Type	Conductive	Dissipative	Anti-Static	Insulative
Function	No initial charge. Provides path for charge to bleed off.	No or low initial charge. Prevents discharge to or from human contact.	Initial charges are suppressed.	Insulators and base polymers. Not ESD.

ESD floor mat safety

Choose the appropriate floor mat(1) for your workbench in line with resistance requirements. Electrical resistance is measured in ohms or shown as this symbol Ω .

Operatives are advised to use two heel grounders(2), featuring a grounding tab to be used in the shoe, under the foot. Having chosen the appropriate floor mat, ensure you have a compatible floor mat grounding wire(3) to connect the earth bonding plug(4) to the mat.

ESD workbench safety

Choose the appropriate mat for your workbench(1) in line with resistance requirements. ESD wristbands(2) are recommended to ground the operator when working with electronic components.

The fabric bands feature silver monofilaments for conductivity. They are designed to be fitted to a coiled grounding cord(3) and used in conjunction with a compliant earth bonding plug(4). A common point grounding wire(5) connects the plug to the mat.

Floor Level Safety Accessories

Defining danger and increasing safety

Cable Protectors help to reduce dangerous trip hazards from trailing cables, an effective floor safety accessory for many different environments. We also offer a choice of floor and barrier tapes, which provide an easy visual aid for clearly highlighting areas of danger, or for the demarcation of specific zones as well as line marking paints. There are also easy install self-adhesive anti-slip products for stairs and tiled floors for added safety, as well as products to protect floor coverings.

CablePro GP

All-purpose cable cover available in 3 m or 9 m lengths

Reduce trip hazards caused by trailing cables. • Protect cables and wires from being pulled and causing costly damage to equipment. • Hazard strip version for increased visibility. • Tapered edges to reduce trip hazards. • For inside and outside use. • Ideal for offices, warehouses, events, shows and exhibitions.

Part	Colour	3 m	9 m

CablePro Data

**Protect data cables,
reduce trip hazards**

Ideal for keeping multiple cable types separated. • Seam in base for snapping in cables. • Reduce trip hazards caused by trailing cables. • Tapered edges to reduce trip hazards. • For inside and outside use. • Ideal for offices, warehouses, events, shows and exhibitions.

Part	Colour	3 m	9 m
Data1	Black	CP010010	CP010003
Data2	Black	CP010011	CP010004

CablePro HD

**One or two duct heavy-duty
cable protector**

Tough ramped edges keep cables protected from wheeled traffic such as cars and forklifts. • Large 23mm diameter channels accommodate heavy-duty cables. • Suitable as indoor or outdoor cable protector. • Ideal for industry, warehouses, events, shows and exhibitions.

Part	Colour	3 m	4.5 m	9 m
HD1	Black	CP010007	-	CP010001
HD2	Black	-	CP010009	CP010002

CablePro Mat

Designed to be laid over cables to reduce trip hazards

Special cable mats for protection from tripping hazards due to loose cables lying around. • Extremely durable nylon surface in dappled colour shades. • Cleated non-slip backing made from durable nitrile rubber with integrated cable run. • Edge in hazard stripe. • Light-resistant and suitable for underfloor heating. • Anti-static. • Easy to lay out, reposition and clean. • Ideal for events, shows and exhibitions. • Material: PA • Product Height: 13mm

Size	Part Code
0.4 m x 1.2 m	CPM010701

COBAtape

Clearly define areas and hazards with floor tape

A self-adhesive backed vinyl floor tape to quickly mark lines on floors. • An ideal solution to mark out areas within factories and industrial settings. • Available in a number of colours, with plain and hazard striped options available to increase visibility further.

Size	Black	Green	Blue	Red	Yellow	White	White/Red	Black/Yellow	White/Green

Barrier Tape

Create temporary barriers to hazardous areas

Durable and easy to apply to inside or outside areas. • Red and white striped means the tape is highly visible. • Strong non-adhesive polyethylene barrier tape for industrial environments.

Size	Red/White
76.2mm x 500 m	BT130301

NEW

Gripfoot

Improve grip on smooth surfaces with an abrasive grit finish

Self-adhesive tapes, cleats or tiles with an abrasive grip surface which helps to improve anti-slip properties.

- A hardwearing and easy to install solution to help prevent slips and trips.
- Available in a range of colours, including a hazard version which provides high visibility in darkness and low light conditions.
- Gripfoot Tape – versatile for floor surfaces, machinery and vehicles.
- Gripfoot Cleats (rectangular) are designed for use on steps and stairs.
- Gripfoot Tiles (square) are ideal for increasing safety on smooth, tiled floors.
- Slip tested to DIN 51130.
- Material: Abrasive grit consisting of aluminium oxide bonded to a polymer substrate. Solvent based acrylic emulsion adhesive backing. Product supplied with a moisture resistant release liner.

COBAGRiP®

COBAGRiP® is a range of UV stabilised GRP sheets, treads and stair nosing designed to offer exceptional levels of slip-resistance both indoors and out, while having outstanding wear and tear qualities. It is an ideal underfoot safety solution for pedestrian and factory walkways, access ramps, gangways and bridges.

The silicone carbide 'gritted' top surface provides effective underfoot grip and is resistant to most solvents and chemicals. It is manufactured using flame retardant materials. Easy to install, simply bond or screw to the existing floor surface, COBAGRiP® is a cost-effective means of refurbishing damaged or slippery floors. Easy to clean (pressure wash).

**Ramp Slip Tested to R13 in accordance with DIN 51130: 2010.
Pendulum Slip Tested in accordance with BS 7976-2: 2002.*

COBAGRiP® Sheet

GRP flooring is the ideal solution to combat slip hazards such as liquids and ice

An easy to install anti-slip solution for internal and external areas. • Simply bond or screw the GRP flooring onto the existing floor surface. • Available in a range of colours which meet the Equality Act requirements, including black, grey and yellow. • Product Height: 5mm

Sheet

1.2m x 1.2m - 5mm

Standing Comfort at Hotter Shoes

Hotter Shoes is a long-established British brand of footwear synonymous with comfort and style. Headquartered in Lancashire, the company has invested heavily in making it one of the most advanced shoe making facilities in the world. Today, it is the largest shoe manufacturer in the UK. **Orthomat® Standard** anti-fatigue matting has recently been installed in Hotter's manufacturing facility.

With a brand such as Hotter, 'comfort' is an inherent part of the company's ethos and the catalyst for the '**Hotter Comfort Concept**'. This extends to the comfort and wellbeing of its employees who work in the factory, and regularly have tasks that require prolonged standing.

"As a producer of Britain's best comfort footwear brand, it only seemed appropriate that our manufacturing and finishing staff should have a comfortable environment in which to work," says Andrew Glover, Health, Safety & Facilities Manager CMIOH.

Explaining the rationale behind the decision to install anti-fatigue mats in Hotter's manufacturing facility, Andrew says:

"We commissioned a survey and found that staff carrying out repetitive actions in a static position were twice as likely to experience work-related absence, such as fatigue, foot and muscular pain, compared to those roles where walking and movement were present."

As promoted in COBA Europe's eBook **#StandUpForHealth**, we are all being advised to 'move more' for better health.

"Our bodies need to move, and using our muscles is good for the joints, our circulation and the heart itself. Many injuries caused by static standing for extended periods such as aches, stiffness and rheumatic diseases are a result of poor movement in work-related activities."

Anti-fatigue mats, coupled with microbreaks, role changes and better employee 'rest' initiatives, are proving part of the solution for Hotter.

KwikLok 100% Recycled PVC Interlocking Floor Tiles

An ideal low cost solution for refurbishing floor surfaces • Easy DIY installation - no adhesive required. • Installation instructions provided. • Non-conductive and fire resistant. • An ideal low cost solution for refurbishing floor surfaces. • Please note: This product may discolour and warp if laid in areas exposed to direct sunlight or extreme temperatures. • Material: 100% recycled PVC • Product Height: 6mm

Entrance Matting Systems

From prestige to budget, we've got it covered

The COBA Africa Matco brand offers an extensive range of Aluminium, Carpet and PVC Tiled based entrance matting systems that are both stylish and deliver superior wear resistance for busy areas subjected to high volumes of pedestrian footfall. Many of our options have environmentally-friendly credentials, incorporating recycled materials in their manufacture. Whether it is interlinking entrance tiles, carpet on rolls or a custom made aluminium system, our fully trained sales team can advise at every stage of specification and installation.

NEW

Plan.a

Defend against dirt and moisture with versatile aluminium entrance matting

Robust, high-quality aluminium system for heavy-duty use designed to cope with high footfall. • Flexible, yet durable PVC linking joints for ease of handling and easy fitting. • Custom-made to order to your specification. • Choose from one, or a combination of different surface options. • Fire tested to BS EN 13501-1 and slip tested to BS 7676-2. • Product Height: 10mm or 17mm

The Client's Reaction

"COBA only had a very restricted time to fit the entrance matting in three different locations, so the pressure was immense but still COBA's team managed to deliver on time and with great precision. They were a very good team, professional, conscientious, attentive and reactive to our business needs," says Armelle Rainjonneau, House Manager – The Bridgewater Hall. She added: "I have no issues in recommending COBA to other organisations. We experienced good all-round service and we are very pleased with the finished result."

The Project

Contractor: Manufactured and installed by COBA Europe
Project: The Bridgewater Hall
Location: Manchester
Products: Plan.a

The Bridgewater Hall, officially opened in 1996, is Manchester's internationally acclaimed concert venue which hosts over 250 musical performances a year, spanning a wide range of musical genres.

New entrance mats were required for The Public Main Entrance, The Box Office Entrance and The Artists' Entrance.

COBA Europe was recommended by The Bridgewater Hall's janitorial supplier to provide the solution. Plan.a was selected

and custom-made to order for the three recessed matwells, and subsequently installed by COBA.

One of the main challenges of the installation was the tight timescales – the matting had to be installed swiftly to ensure completion before the evening performance.

The installation involved removing the old matting and carrying out some sub-floor preparation to ensure the surface area was level.

Plan.a with Alba (nylon) carpet and PVC scrapers was then installed in each area. The Bridgewater Hall opted for a closed construction surface design.

How to Specify Entrance Matting

This brief guide is intended to assist you in making the right choice of entrance matting first time around. Our Support Team is also on hand to answer any queries and arrange site surveys for the most accurate product specifications. Look out for the icons throughout this catalogue, to help you find the best suited products for your environment.

Zones

We recommend a zoning system when choosing your entrance matting. Whether your entrance extends outdoors or is fully covered, creating three zones delivers optimum dirt barrier performance, ensuring interior floors are kept clean and hazard free.

Zone 1

Zone 1 is all about scraping and removing the initial 'surface' dirt, mud and moisture. The matting should have a more abrasive surface, or tough bristle, for scraping action.

Zone 2

Zone 2 is usually the location of the main entrance mat section. Often set in a recessed matwell, it is designed to capture dirt and moisture for removal later on.

Zone 3

Zone 3 cleans and dries the soles of shoes or wheels, before they finally reach the internal floor coverings.

Contaminants

All of our products protect you against contaminants but some products are more effective than others for removing either dirt or moisture. Use these icons to determine which.

**Most Effective
Against Dirt/Soil**

**Most Effective
Against Moisture**

Pedestrian Traffic

It is important that matting is a sufficient length to allow moisture and debris to be wiped off footwear as people walk across the mat. Our COBA Africa team recommends a minimum of six footsteps for this to be effective.

Supply & Install

Supply:

With distribution centres across Africa, we're proud to be able to offer next day delivery on many of our products, perfect for those last minute jobs! Our **EasyInstall™** range of entrance matting has been developed with this in mind. Off the shelf, modular systems, they are quick to order and install. If you've got more time to spare, why not get in touch with our team for free samples, site surveys and support!

Installation:

Specifying the right entrance matting for your building is one thing but installation of some of the most popular systems such as aluminium matting is also a specialist job. That's why we offer a complete supply and install service.

Our trusted team have years of experience working with COBA products, and know them inside out. We can even install your project overnight to prevent any business downtime. Once we've installed your project we'll clear up and dispose of any rubbish, leaving you to admire your new flooring installation!

Entrance Architect

Become an Expert on Entrance and Barrier Matting with **Entrance Architect** the latest app from COBA Africa.

Download Entrance Architect FREE today on the Apple or Android app stores!

Premier Track

Protect internal flooring with heavy-duty, premium quality entrance tiles

Effectively removes moisture and debris, even from wheeled trolleys, without buckling. • Safe for high heeled footwear, heels won't get stuck in the tiles. • Exceptionally durable carpet inserts manufactured from ECONYL®, a recycled nylon material made from discarded fishing nets and other sources. • Ideal for recessed entrance wells. • Fire tested to BS EN 13501-1 and slip tested to BS 7676-2.

Royal Victoria Place Shopping Centre

Kent, UK

Premier Track Tiles and Premier Grip Tiles incorporating Logo Mat

Royal Victoria Place Shopping Centre has installed Premier Tiles, complete with the integration of a customised Logo Mat, in its two main public entrance areas. The Shopping Centre, attracting over 10 million visitors per annum, required an entrance system that was durable and functional, yet looked smart too. UK Facilities Solutions carried out the installation in recessed matwells, and considered it to be a straightforward and hassle-free task.

"The new entrance matting has really refreshed both entrances to Royal Victoria Place, and we are very pleased with its appearance and performance. The logo effectively promotes our brand, and creates a positive first impression," says Nick Connell, Operations Manager, Royal Victoria Place Shopping Centre.

COVID-19 Response Range

Products and guidance on managing facilities during the Coronavirus pandemic in 2020.

Introduction

The global Coronavirus pandemic in 2020 caused governments, businesses and the public to take unprecedented steps to protect themselves. Whilst measures vary geographically, social interaction and hygiene practises are still greatly affected worldwide. Social distancing and contamination control are effective ways to reduce virus spread. This range of social distancing and hygiene products from COBA are designed to help businesses operate efficiently and safely.

The Issues

Social distancing

Visual aids are key to communicate to visitors and employees your specific guidance around social distancing. The South African government's guidance on social distancing remains 1.5 metres wherever possible. For businesses that can't operate with 1.5 metres such as pubs and hairdressers, we have a range of smaller mats, including directional signs and other instructions around enhanced hygiene such as hand sanitisation.

Fatigue

One thing that hasn't changed since the COVID-19 pandemic reached South Africa, is that key workers across the country in supermarkets, warehouses, and manufacturing locations have stoically been attending work. Issues from standing fatigue and health ailments caused by prolonged standing haven't gone away. We've updated two of our key Orthomat® products with

social distancing messaging. And our newer Hygimat product is an ideal way to bring fatigue relief into hygienic sensitive locations.

Cross-contamination

There has been a huge campaign of public awareness since the pandemic began and so everyone is aware the risks posed by physical contact with items that may be carrying viruses. There is perhaps less awareness around viruses and other germs being transported on people's footwear between different buildings and departments.

Due to the COVID-19 pandemic, contamination control is more important now than ever before. Contamination between buildings and rooms occurs at the threshold, and all doorways have one thing in common, a doormat. Our range of tack mats and entrance mats are designed to improve hygiene and reduce walked in bacteria and other particles.

Social Distancing Floor Mats

Loose lay floor mats to promote social distancing, and health and hygiene awareness

- Communicate hygiene and social distancing rules to your staff or customers to limit the spread of Coronavirus.
- Ideal for all public buildings including retail, hospitality, healthcare, supermarkets, and offices.
- A cost effective and durable way to demonstrate that your business is 'COVID-19 Secure'.
- Printed digitally for superb colour reproduction and definition.
- Low profile borders to reduce the risk of trips.
- Machine washable at 30°C.
- Mats stay in place thanks to vinyl backing, but can also be relocated and washed unlike floor stickers.
- Superior Nitrile Rubber backing with Twist Pile finish available for high traffic areas.
- PVC backing is available in both Velour and Twist Pile finish, and the unedged option has a Velour finish.
- Delivery in 2 weeks.
- Product Height: +/- 6 mm.

Branded Social Distancing Floor Mats

Branded floor mats to promote social distancing available in standard and bespoke sizes

- Communicate social distancing rules to your staff or customers to reduce coronavirus spread.
- Mats can be designed to include your logo and match your brand guidelines – creating a better experience for staff and customers.
- Cost effective and durable way to demonstrate your commitment to health and safety.
- Printed digitally for superb colour reproduction and definition.
- Low profile borders to reduce the risk of trips.
- Machine washable at 30°C.
- Mats stay in place thanks to vinyl backing, but can also be relocated and washed unlike floor stickers.
- Product Height: 6 mm.

Bespoke sizes

SDM000005

Choose from standard designs or create your own to compliment your brand. Adding your logo creates a strong visual impact while showing customers you care.

Business Being COVID-19 Secure

Many businesses, such as supermarkets, manufacturers and logistics providers have remained open throughout the pandemic to serve key workers and key industries, and therefore have had to learn how to mitigate risk and meet government recommendations around health and safety as they go. Other industries such as hospitality and retail, having been closed for several months, are also now determining what their 'new normal' will look like. In either case we are in uncharted territory for most people, and are learning as we go.

Enforcing Social Distancing

Whether it's general messaging at the door, one way systems, or reminders to stay hygienic, businesses are thinking about how people move around their workplaces in more detail than ever before. Every business and every building will have its own specific needs, but using frequent visual reminders such as

floor tape, floor mats, and signage, is the most effective way to communicate your rules when there may not be a member of staff available. Mats are great because they can be picked up and moved around.

Reducing cross-contamination

Most responsible people now know to wash or sanitise their hands, not touch their face, and not touch things they don't need to. However, in nearly all businesses there is a level of human interaction required to communicate. SafeScreen Pro offers a clear barrier that can protect people at their desk or reception. Also, simply moving around a building or site also presents the hidden danger of contamination from footwear. Viruses fall to the floor and can be tracked around by people walking. With a disinfectant mat at key thresholds this form of contamination can be stopped dead.

Social Distancing Scatter Mats for Schools

Loose lay floor mats to promote social distancing in education

- Communicate social distancing rules to your pupils to reduce risk of coronavirus spread.
- Ideal for nurseries, playgroups and primary schools.
- Help children maintain social distancing quickly and easily during reading time, assemblies or whilst cueing.
- Cost effective and durable way to demonstrate social distancing measures.
- Available in packs of 8 scatter mats for classrooms.
- Printed digitally for superb colour reproduction and a bright appearance that enhances the classroom.
- Low profile borders to reduce the risk of trips.
- Machine washable at 30°C.
- Mats stay in place thanks to vinyl backing, but can also be relocated and washed unlike floor stickers.
- Product Height: 6 mm.

Education

Being COVID-19 Secure

With schools already reopen for some pupils and more due to return soon, social distancing rules will need to be followed for the safety of the children, their teachers, and the community. This is a big challenge for school staff, especially those in early years education.

The unprecedented circumstances we find ourselves in are a challenge for everyone. Even more for all those in schools and nurseries, as it is vital to communicate the importance of staying apart to children in addition to the pressures of the regular curriculum.

A lot of adults struggle with the advice given by scientists and the government and are not always sure what is the best way to deal with a situation. So how can young people be expected to understand and cope with this in order to be kept as safe as possible?

It is not only the classroom and the playground but also drop off and pick up times, lunch, and the handling of equipment has to be taken into consideration.

Hygiene and distancing

New routines have to be established, washing hands more often, disinfecting surfaces and children not sitting or standing as close to their friends as they might like. This is a very big ask for all young people. Smaller children may struggle to understand the seriousness of the situation, and teenagers, who by nature are more likely to test rules and boundaries.

Visuals help understanding and retention

We all know the saying – a picture paints a thousand words. And it is true, particularly when it comes to remembering advice when surrounded by distractions.

This starts with easy to apply and highly visible segmentation in drop off zones and in the playground, which can be achieved by using self-adhesive tapes or line making paint to highlight spaces for different groups and distances that should be kept in different colours.

Social distancing help for little people

Clear and easy to understand messaging is provided with our social distancing mats especially designed for schools, colleges and universities. They are easy to lay out, stay in place but can be relocated with ease. The social distancing floor mats can be machine washed to keep their appealing look and their important message visible over time, unlike than floor stickers that may deteriorate and need to be replaced after time. For small children we have smaller mats with cute animal motives to mark areas of personal play space in nursery or classrooms.

COBAtape for Social Distancing

Clearly define areas to promote social distancing with floor tape

- Communicate social distancing rules to your staff or customers to reduce coronavirus spread.
- Ideal for all public buildings including hospitals, supermarkets, and offices, as well as factories and industrial settings.
- Cost effective and durable way to demonstrate that you take health and safety seriously.
- Self-adhesive backed vinyl floor tape quickly marks lines on floors.
- Available in a number of colours, with plain and hazard striped options available to increase visibility further.
- For pedestrian use only.
- Clean surface prior to adhesion.

Elimination of bacteria

Cleanliness on a microbial level

Prevent the spread of walked in bacteria, viruses and infectious microorganisms.

Entra-Clean HygienePlus

The washable doormat that actively kills germs

- Removes visible dirt and kills invisible microbes.
- HygienePlus means the mat is treated with the EU-registered biocide, BI-OME registered with OEKO-TEX® an antimicrobial and virus reducing technology. BI-OME works by effectively killing bacteria when contact is made with the mat.
- Although the treatment is a highly effective antimicrobial agent, it does not cause any skin irritations.
- A new concept in entrance matting.
- Improve floor level hygiene around your business – important whilst fighting COVID-19 and beyond.
- More sustainable – less frequent washing required, and on lower temperatures.
- Free of metals.
- Fully machine washable – with no reduction in active cleaning power for the life of the mat.
- Suitable for all facilities, in particular offices, hotels and leisure, retirement homes and healthcare settings.
- Reduces annoying odours caused by bacteria and fungi.

Entra-Clean HygienePlus

A Revolution in Floor-Level Cleanliness

COBA Europe is proud to present Entra-Clean **HygienePlus** - our first doormat with active germ-killing technology built-in. A ground-breaking new antimicrobial treatment makes this product much more than simply another entrance mat.

How does the new Entra-Clean Hygiene+ work?

Hygiene+ is a game changer. In addition to the high quality materials and construction, Entra-Clean Hygiene+ is treated with BI-OME, an antimicrobial and virus reducing technology. Even if you are not actively cleaning, the doormat remains clean on microbial level and the technology remains active throughout the lifespan of the mat.

What is BI-OME treatment?

BI-OME is a biocide agent that has a durable viral reducing effect on surfaces such as entrance mats. The treatment with BI-OME can reduce the viral activity of enveloped viruses in a time span of 2 hours, while the half life (time it takes for 50% of the viruses not to become infectious) is about 4 hours for untreated surfaces.

What happens if the doormat is cleaned or machine washed?

You can clean Entra-Clean Hygiene+ like any other doormat, you can even machine wash it. The treatment with BI-OME stays on the fibres and remains active, this means you can wash it on lower temperatures to save energy and still have a doormat that is clean on microbial levels.

BI-OME is a registered and tested treatment

The **BI-OME** treatment is registered with **OEKO-TEX®** to guarantee maximum consumer safety and BPR (PT2, PT7, PT9) registered with ECHA (European Chemicals Agency).

Benefits of a Hygiene+ treated doormat:

- Elimination of bacteria
- Cleanliness on a microbial level
- Reduced odour
- Possible reduction of viral activity of enveloped viruses
- Less water consumption, less frequent washing required
- Energy saving by washing on low temperatures
- Does not cause skin irritation
- Free of metals
- Permanent technology

Other products available with HygienePlus treatment

The new BI-OME treatment technology is also available on our **Promomat** and **Cosmo** doormats. Minimum order quantities apply – please ask for details.

COBA Care Disinfectant Boot Bath

Industrial grade hygiene mat that reduces footwear contamination, ideal to support COVID-19 protection

- Flexible natural rubber nodules deliver excellent dirt scraping and trapping action, while the disinfectant solution cleans and sanitises footwear.
- 100% Recycled rubber.
- Loose lay on level surface, no installation necessary.
- Fill base with COBA Care Disinfectant Solution.
- Improves hygiene and contamination control by cleaning the soles of shoes and boots.
- Suitable for industrial environments where hygiene is important e.g. mining, construction, engineering and farming.
- Slip-resistant base, with bevelled edges, to help retain position and reduce tripping hazards.
- Combine with an absorbent mat to dry footwear when stepping out.
- Material: Recycled Rubber.
- Product Height: 55 mm.
- Inside Tray Depth: 44 mm.

Use in conjunction with a COBAwash®, Wash & Clean, Microfibre Doormat or the Social Distancing Floor Mat.

Mat Size	Part Code	Weight	Disinfectant
810 mm x 975 mm	BOOT-819950	14 kg	up to 7.3 litres

Fill base with liquid disinfectant. • Step in to scrape and sanitise. • Specially designed nodules scrape dirt and allow footwear to immerse in disinfectant. • Combine with an absorbent mat to dry footwear of excess liquid.

COBA Care Disinfectant Shoe Bath

The hygienic mat that reduces footwear contamination, ideal to support COVID-19 protection

- Flexible natural rubber nodules deliver excellent dirt scraping and trapping action, while the disinfectant solution cleans and sanitises footwear.
- 100% Recycled rubber.
- Loose lay on level surface, no installation necessary.
- Fill base with COBA Care Disinfectant Solution.
- Improves hygiene and contamination control by cleaning the soles of shoes and boots.
- Suitable for offices and other commercial buildings, as well as any workplace where hygiene is important e.g. healthcare, food manufacturing, catering, hospitality, clean rooms or food retail.
- Slip-resistant base, with bevelled edges, to help retain position and reduce tripping hazards.
- Combine with an absorbent mat to dry footwear when stepping out. We recommend COBAwash®, Wash & Clean, Microfibre Doormat or the Social Distancing Floor Mat.
- Material: Recycled Rubber.
- Product Height: 26 mm.
- Inside Tray Depth: 16 mm.

Use in conjunction with a COBAwash®, Wash & Clean, Microfibre Doormat or the Social Distancing Floor Mat.

Mat Size	Part Code	Weight	Disinfectant
605 mm x 810 mm	BOOT-618119	3 kg	up to 2 litres

COBA Disinfectant Mat

Scrapes and sanitises footwear in one go, ideal to support COVID-19 protection

- Resilient vinyl loops scrape dirt off shoes, while the disinfectant solution cleans and sanitises.
- Non-slip vinyl backing and durable, ramped edging reduce the risk of tripping.
- Suitable for any location where hygiene is important such as healthcare, food manufacturing, catering, hospitality, clean rooms or retail.
- Loose lay on level surface, no installation necessary.
- Combine with an absorbent mat to dry footwear when stepping out. We recommend COBAwash®, Wash & Clean, Microfibre Doormat or the Social Distancing Mat.
- NEW: Small mat, perfect for low traffic, room-to-room contamination control.
- Material is REACH Compliant.
- Product Height: 15 mm.

Mat Size	Part Code	Weight	Disinfectant
600 mm x 500 mm	CDM010	2.5 kg	up to 1 litre
700 mm x 900 mm	CDM001	5 kg	up to 2.25 litres
1300 mm x 1600 mm	CDM002	10 kg	up to 4 litres

Use in conjunction with a Microfibre mat

Use in conjunction with a COBAwash®, Wash & Clean, Microfibre Doormat or the Social Distancing Floor Mat.

Fill base with liquid disinfectant. • Step in to scrape and sanitise. • Specially designed nodules scrape dirt and allow footwear to immerse in disinfectant. • Combine with an absorbent mat to dry footwear of excess liquid.

COBA Care Disinfectant Solution

CaterQAC, a quaternary ammonium based disinfectant, is highly recommended for use against COVID-19

- Ideal disinfectant solution for use with disinfectant mats, to sanitise footwear.
- Application for disinfectant mats: • Add recommended amount to the mat basin. Step onto the mat, covering base of footwear in dilution. Gently scrape and sanitise by wiping soles on the mat surface. Renew the solution when visibly dirty.
- Use with COBA Disinfectant Mat or Fingertip Disinfectant Mat
- For use on all surfaces, in all environments.
- Food approved – SANS 1828.
- PH in dilution: 10.5 +/- 0.5.
- Active ingredient: Di-n-decyl dimethyl ammonium chloride.
- Avoid contact with skin and eyes (see product label for further precautions).
- Strength designation: 4.6%.
- COBA products are REACH compliant.

Store below 30°C.

Moisture Control Mat

The perfect walk-off for Disinfectant Mats

Microfibre Doormat

Washable doormat with super absorbency and microfibre technology

- Hygienic microfibre technology with flexible, ultra-fine fibres provide deep-cleaning action.
- Effectively penetrates those hard to reach treads on footwear. Friction from the fibres generates a static charge that attracts and traps dust/debris.
- Effectively penetrates those hard to reach treads on footwear and wheeled trollies.
- Superior 'brushing and wiping' with 'rapid dry' properties that outperform cotton.
- Luxuriously soft pile that keeps entrances looking smart, stylish and free from lint.
- Environmentally-friendly – does not require chemical pre-treatment or washing detergents.
- Material: Microfibre
- Product Height: 8 mm

Coir

Classic dirt-scraping entrance mat made from coconut husks

Natural doormat made from coconut husk fibres. • Hardwearing and absorbent, coir fibres are renowned for their dirt-scraping properties. • Suitable for indoor use. Can be used on floor surfaces or installed into matwells. • Heavy-duty, anti-slip vinyl backing for minimum movement. • Can be printed on to create logomats. • Coir is a natural product and may contain minor variations and irregularities that are characteristic of the husk fibres. Surface printing of logos onto the coir will naturally fade and shedding may occur. Material: Natural coir fibre • Product Height: 17mm or 23mm

Contamination Control Mats

NEW

First-Step

The first step to contamination control

A hygienic pad of peel-off, disposable sheets, manufactured from an anti-microbial agent to protect against bacteria, mould and mildew.

- The 'tacky' sheets capture dirt and dust from footwear and wheeled equipment for contamination control.
- When the top sheet becomes soiled, simply peel off to reveal a clean layer.
- Comes with self-adhesive backing to keep the mat in place.
- Ideal for hospitals, clean rooms, general industrial environments, and any other area where hygiene is an important factor.
- Product Height: 1.5mm

Cleaning Entrance Matting

Did you know it can cost over **R9 000** to remove **1kg** of dirt once inside a commercial building? As it's possible for 1 person to walk in 58 grams of dirt per day, **1000 people in 20 days** would generate **11kg** – or almost **R110 000** in potential monthly cleaning costs.

A slip or trip due to walked in dirt or liquid could even lead to serious injuries or legal action and compensation claims.

Fortunately effective Entrance Matting can reduce walked in dirt by up to **90%**!

Once you have the right entrance matting in place, a well planned strategy for regular mat cleaning and maintenance is essential for optimum performance, product lifespan and return on investment.

Maximise on effectiveness and download the full Cleaning and Maintenance Guide at www.cobaafrica.com

Mats for Catering

Serving Up Underfoot Safety

Those working in catering, or in the bar industry, are especially vulnerable to the risk of slipping on wet or greasy floor surfaces. Our purpose designed anti-slip mats significantly help safety underfoot. There are hygienic, anti-microbial options specifically for food preparation areas. Many of our mats also improve comfort providing fatigue relief for those who stand. They also help to reduce glass and china breakage.

Table Bay Hotel Cape Town, South Africa

TABLE BAY HOTEL experiences the benefits of COBAdeluxe Bar Mats.

COBAdeluxe Rubber Bar Mats have been selected and installed at the magnificent Table Bay Hotel in Cape Town, South Africa.

The luxurious five star hotel, with views out to Table Mountain and the Atlantic Ocean, was opened in 1997 by no other than, Nelson Mandela. Its popularity means that its facilities are in high demand, and this includes its bar areas. They are located both inside the hotel and outside, around the pool. Recognising the need for quality floor mats, Table Bay Hotel chose COBAdeluxe bar mats to enhance floor safety and reduce glass breakage.

Its 19mm thickness provides a comfortable 'anti-fatigue' standing surface for bartenders who are very often on their feet for prolonged periods of time. The matting also features open holes which allow spilt liquids to drain away from the surface of the mat, to reduce the risk of slipping.

The other major benefit of COBAdeluxe is that it helps to reduce glass and crockery breakage – dropped glassware tends to bounce rather than break.

"The quality of the mats is good and they help our bar staff a lot. I really like the fact that a bottle can drop and actually not break, not like some other bar mats that can be too hard – believe me, I have tested it!" says Camissa Restaurant Manager, Heinrich La Meyer.

**IMPROVE COMFORT –
REDUCE BREAKAGES**

COBAdeluxe

Fatigue relief ideal for bar areas

Effective in reducing glass breakage. • Creates a safe and very comfortable standing surface. • Its thickness makes it a durable mat that can withstand impact. • Quickly cover large areas if used as a connecting system. • Made from hardwearing rubber providing longevity. • Product Height: 18.5mm

Varsfontein Stud Farm

Paarl, South Africa

COBA Africa (Pty) Ltd has recently supplied a substantial quantity of Ringmats which have been installed at an internationally renowned Stud Farm. Varsfontein Stud is one of South Africa's leading Stud Farms consisting of over 600 horses which require quality equestrian rubber floor matting for its covering barn. The matting was supplied to Varsfontein Stud Farm via Rubba Rubba, who was also the contractor who carried out the installations.

Ringmats from COBA Africa (Pty) Ltd are manufactured from heavy-duty rubber with a luxuriously thick product height of 23mm. They are an ideal choice for demanding indoor and outdoor equestrian environments. The mats have a raised pattern, open holed top surface that provide both comfort and safety to horses. The holes provide a drainage channel and allow any debris to fall through the mat, while the raised surface gives extra grip to help horses have a safer footing. For this reason, they are also ideal for stable washdown areas.

Carl De Vos (General Manager):

"We recently built a new covering barn for our thoroughbred breeding operation. The rubber matting we had installed on the floor is very practical as it is hardy and handles the wear of these heavy animals. It also provides excellent grip under foot so that they don't slip. We are very happy with our choice and would recommend this matting in any equine establishment that may be looking for non-slip underfoot conditions for their horses."

moving edge

Moving Edge is a trusted name in industry, with a reputation for innovative, high-performance cutting tools. A brand of COBA Africa, we have established a flexible range of both enclosed-blade and utility safety knives, as well as many useful accessories.

Moving Edge is proudly British and has been championing innovation with its unique range of dynamic blade knives for over 20 years. We not only bring our customers the choice they need, but the support to use our products safely and effectively in the workplace.

Cut safely, choose wisely – use **Moving Edge**.
